

Cost Benchmarking

Benchmark cost performance within the supply chain and forecast future trends

With Rystad Energy's Cost Benchmarking Solution, you can analyze field costs for offshore, onshore and LNG projects.

✓ Cost benchmarking for reserves, production, surface facilities, subsea equipment, SURF lines, drilling and completions and much more

✓ Labor rates for hundreds of job descriptions across the energy supply chain

✓ Project factsheets detailing scope and cost information

Key workflows

Understand potential **operator budgets** within select geographies before you tender

Anchor tenders to best-in-class project cost performance from similar, historical or upcoming projects

Benchmark performance by evaluating **historical project performance** against selected peers at an asset-level

Evaluate internal project cost performance against **industry norms**

Identify **internal cost savings opportunities** by understanding detailed industry cost performance

Evaluate **industry cost performance** to determine which upcoming opportunities should be prioritized

Solution Coverage

Data

Can be accessed via:

Interactive web-based dashboards: Access data in easy-to-use interfaces curated for your workflows

Datafeed integration: via ftp, OData or Snowflake

Analytics

A comprehensive library of expert reports and commentaries:

Quarterly Reports on the global oil and gas industry to estimate and benchmark costs for producing fields and greenfield projects worldwide.
